

# Security Response

Vendor	Rating	Comment
<b>Arista</b>	A+	<b>Correct behaviour in the first place</b>
<b>Cisco</b>	A+	<b>Correct behaviour in the first place</b>
<b>Mikrotik</b>	A+	<b>Correct behaviour in the first place</b>
<b>Bird</b>	A+	<b>Correct behaviour in the first place</b>
<b>OpenBSD</b>	A	Quick reply, only regret was telling them so early on
<b>Juniper</b>	B	Replied, Was polite and seemingly knowledgeable, eventually pushed out a JunOS patch, no date for default-safe behaviour.
<b>Nokia</b>	B	Replied, future (March 2024) SROS versions will be default-safe. Eventual customer communication.
<b>FRR</b>	C	Quick reply, acked issue, disappeared all replies after, 0 replies after the first round trips! Only patched after public disclosure!
<b>Extreme</b>	D	Had to ask for contacts from many people, Security team ran down the clock to instead tell me they didn't think it was a issue
